MATTHEW GUENTHER

A full-stack developer with a heavy ops background, a B.S. in Information Technology from CSU, 6 years of military experience, and an unparalleled drive to continue growing my skill set.

SKILLS

JavaScript, AngularJS, NodeJS, MongooseJS, Express, MongoDB, HTML, CSS, Sass, Bootstrap, Materialize CSS, Git/GitHub, Firebase (BaaS)

PROJECTS

LOGOS ACADEMY - A full-stack (MEAN) application that on-boards new CrossFit gym members through an expert-tested curriculum.
- Members can track their progress, earn badges at specific milestones, and track personal physical goals.
- Gym admins can configure their gym's program, track members' progress and enable/disable member accounts and assign/remove admin permissions.

THE DOGGIE OASIS - A full-stack (MEAN) application created for a local business.
- Front-end content and store inventory can be maintained without any programming knowledge by using an administrative login and password.
- Created 11 database collections in MongoDB for modification of content.

RELATED EXPERIENCE

NETWORK ADMINISTRATOR AT UNIVERSAL HEALTH SERVICES – 2014-2015
- Programmed a navigable script reducing the duration of routine maintenance and troubleshooting tasks by 92%.
- Created a scripted installation of the enterprise OS image that was deployed to 3,000 newly purchased computers.

INFORMATION SYSTEMS TECHNICIAN AT U.S. NAVY – 2005-2011
- Rapidly coded an intranet trouble ticket submission site when a server outage took down the primary ticketing system.

VOLUNTEER

WEB CONSULTING - BOYS AND GIRLS CLUBS OF UTAH COUNTY – 2015
- Assisted with the planning and implementation of a volunteer application form and a searchable job listing page allowing for posts, modifications, and e-mail notifications of job applicants.

EDUCATION

COLORADO STATE UNIVERSITY GLOBAL CAMPUS – B.S. INFORMATION TECHNOLOGY, 2015 - 3.91 GPA

DEVMOUNTAIN – TOTAL-IMMERSION WEB DEVELOPMENT PROGRAM
